:

🧠 CHALLENGE 1: Explore the DOM (Document Object Model)

Choose the version that feels most comfortable for you. You don't need to do all three options—just pick the one that suits you best:

Option 1 – Visual (if you're feeling focused)

- 🔗 LINK TO EXPLANATORY VIDEO

Option 2 – Playful (if you want something more visual or interactive)

- https://flukeout.github.io/

Option 3 – Reflective (if you like being creative)

👉 Complete this sentence:

"If a web page were a theater, the DOM would be…"

You can:

- Create a simple drawing or diagram (using a tool you've already worked with)
- Or make it into a little dialogue with your classmates

PICKING THE THIRD OPTION:

Option 3 – Reflective (if you like being creative)

Complete this sentence:

"If a web page were a theater, the DOM would be…"

Here are two beginner-friendly ideas:

✏️ **Drawing idea:**

Draw a stage (the webpage).

- The **DOM** is the script that tells each actor (HTML element) what to do.
- The **JavaScript** is the director giving instructions during the play.

💬 **Dialogue idea:**

You could write something like:

> DOM, can you help me change the title on my page? Just use `document.getElementById('title')` and I'll find it.
